SOA on your terms and our expertise

ON DEMAND BUSINESS™

Contents

- Getting started
(SOA lifecycle, basic education, certification)
- Focus areas of SOA lifecycle
- Business Integration Roles
- Education roadmaps
- Useful links and materials

Why SOA education ?

- SOA preparation
 - Implement new business models
 - Establish governance
 - Establish / change service infrastructure
 - Service composition, service decomposition
 - Top-down, bottom-up, meet-in-the-middle approach

- SOA Implementation
 - Complex software
 - SOA enabled vs proof of concept

- 30% of all SOA implementation project turn into „critical“

Good education finally helps to sell the product(s)

Overview of the Model, Assemble, Deploy and Manage lifecycle

- Discover
- Construct & Test
- Compose

- Integrate
 - People
 - Process
 - Information

- Gather requirements
- Model & Simulate
- Design

- Financial transparency
- Business/IT alignment
- Process control

- Manage applications & services
- Manage identity & compliance
- Monitor business metrics

IBM SOA governance lifecycle

Establish the governance need

- Document and validate business strategy for SOA and IT
- Assess current IT and SOA capabilities
- Define/Refine SOA vision and strategy
- Review current Governance capabilities and arrangements
- Layout governance plan

Define the governance approach

- Define/modify governance processes
- Design policies and enforcement mechanisms
- Identify success factors, metrics
- Identify owners and funding model
- Charter/refine SOA Center of Excellence
- Design governance IT infrastructure

Monitor and Manage the governance processes

- Monitor compliance with policies
- Monitor compliance with governance arrangements
- Monitor IT effectiveness metrics

Deploy the governance model incrementally

- Deploy governance mechanisms
- Deploy governance IT infrastructure
- Educate and deploy on expected behaviors and practices
- Deploy policies

Getting started with SOA

Web-based offerings. For more details refer to: <http://www.ibm.com/software/sw-training>

Public

Business Partners Only

Brand new 4.5 days hands-on workshop

SW351
Getting Started With SOA Workshop

SOA Certification

Test **665**, Architectural Design of SOA Solutions

Availability planned for June 2006

Certifies as **SOA solution designer**

More tests under consideration, e.g. **SOA Architect**

Visit www.ibm.com/certify for more information

Five focus areas within the SOA lifecycle

- **Business Driven Development**
Enabling clients to govern the **business process of software development**.
- **Maximizing People Productivity within an SOA**
Delivered through a natural, intuitive, adaptive **user experience**.
- **Business Process Management**
Understand, improve, and manage your business processes to **enable rapid operational change**.
- **Information as a Service**
Achieve **new levels of information** flexibility, consistency and availability.
- **IT Service Management**
Manage your IT infrastructure, to more effectively and efficiently **deliver IT services**.

Business driven development

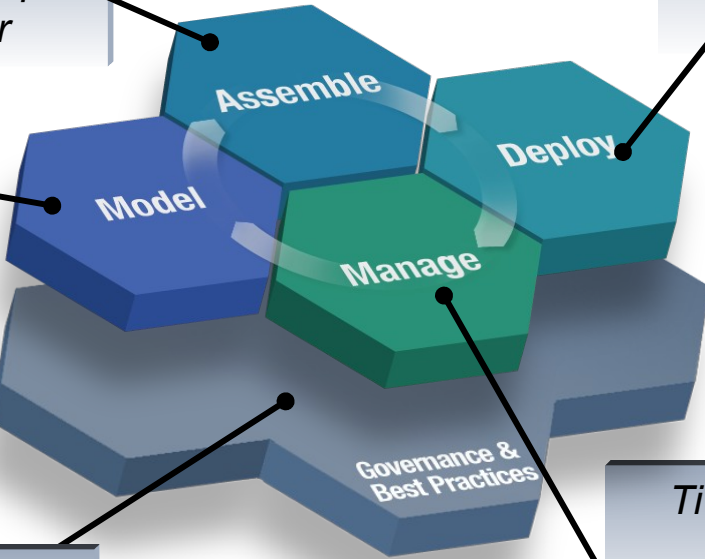

- Enables proper government of the business process of software development.

Harvest, create, test and assemble service assets

Rational Application Developer
WebSphere Integration Developer
Rational Functional Tester

WebSphere Process Server
Rational Team Unifying Platform
Tivoli Configuration Manager
WebSphere Portal Server

Integrate processes and deliver across all internal and external elements

Rational Software Architect
WebSphere Business Modeler
Rational RequisitePro

Define requirements, codify business process and enforce standards

Rational Method Composer
Rational Portfolio Manager

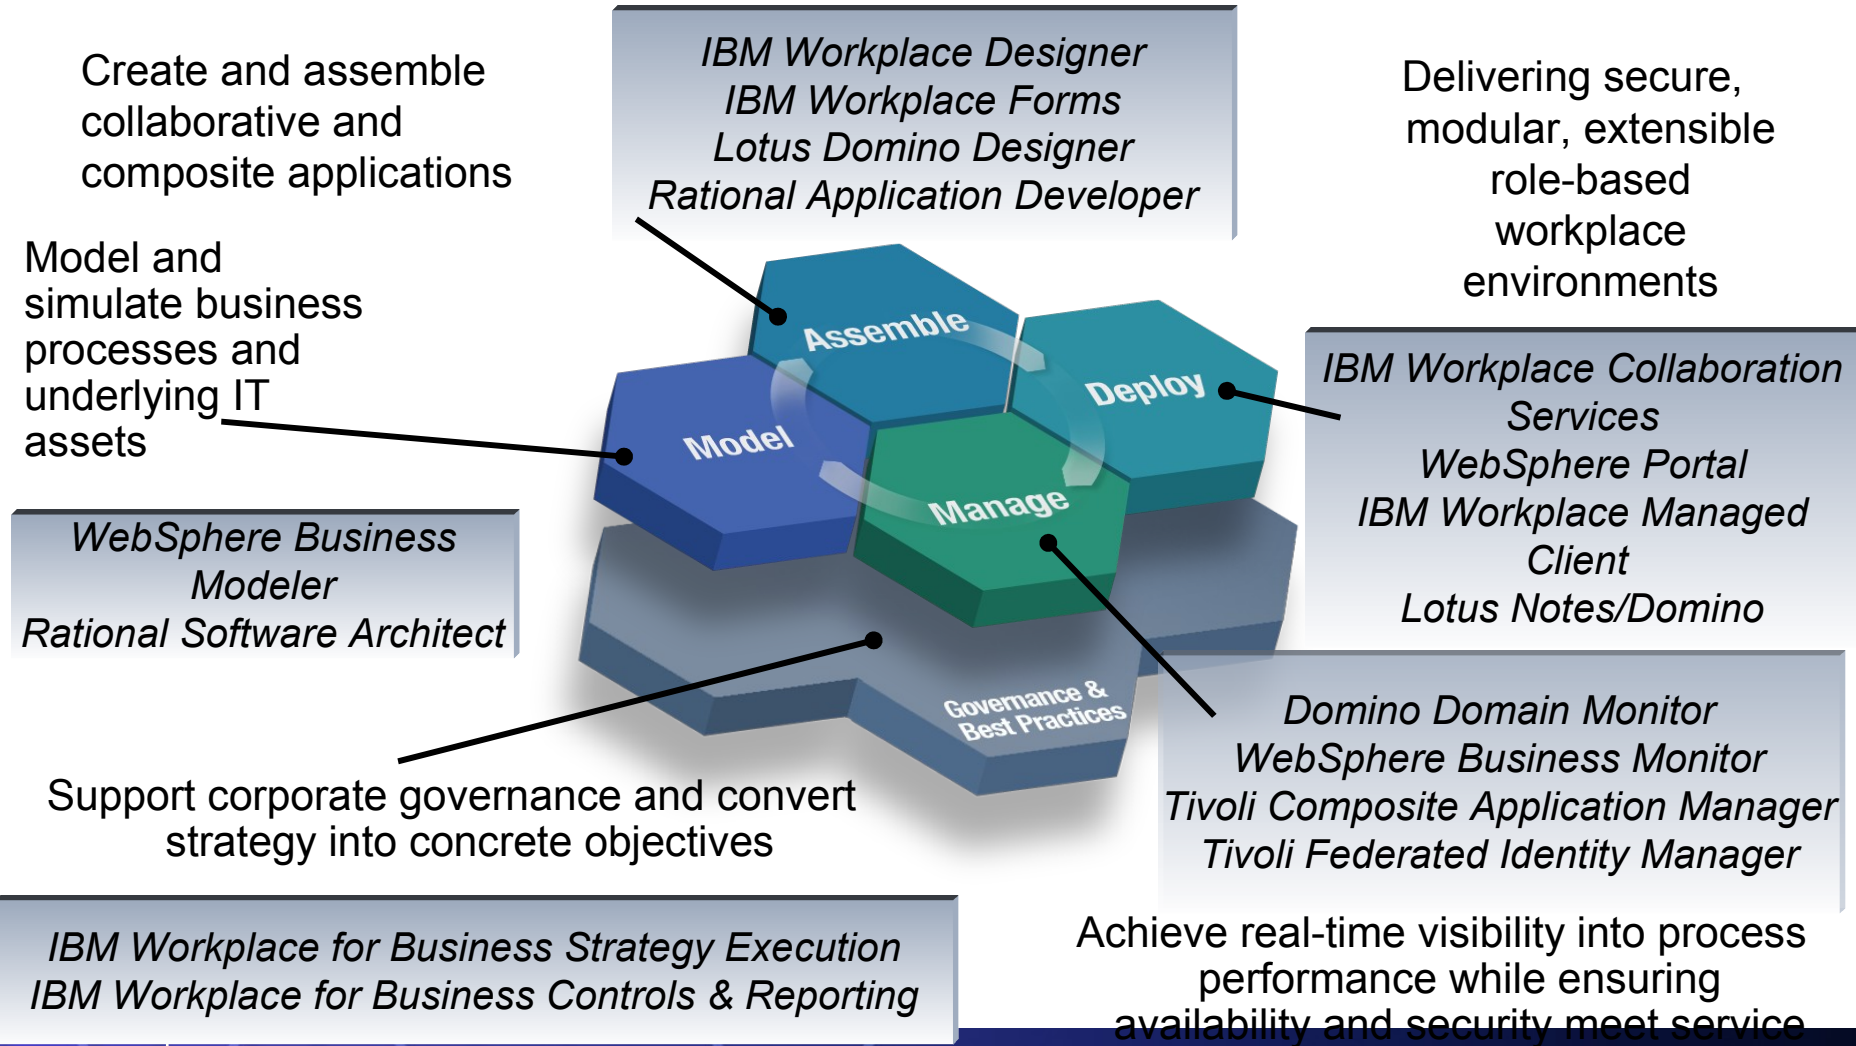

Tivoli Composite Application Manager
WebSphere Business Monitor

Monitor composite application performance and adjust accordingly

Exercise authority and responsibility through process measurement

People productivity within an SOA

- Delivered through a natural, intuitive, adaptive user experience.

Business process management

Create and compose services around process models and business rules

WebSphere Integration Developer
Rational Application Developer

Integrate processes and deliver across all internal and external elements

WebSphere Process Server
WebSphere Partner Gateway
WebSphere ESB
WebSphere Message Broker

Model and simulate business processes and underlying IT assets

WebSphere Business Modeler
Rational Software Architect

Assemble

Deploy

Model

Manage

Governance & Best Practices

Achieve real-time visibility into process performance while ensuring availability & security meet service levels

Define and refine process management rules and priorities

WebSphere Business Monitor

Information as a service

Compose information services across heterogeneous sources

Service information requests

*WebSphere Data Integration Platform
WebSphere Product Center
WebSphere Customer Center*

*DB2 UDB, Informix...
IBM Content Manager
WebSphere Data Integration Platform
IBM Workplace Collaboration Services*

Understand information assets and links to business context

*WebSphere Data Integration Platform
Rational Data Architect*

Model

Assemble

Deploy

Manage

Governance & Best Practices

Ensure performance, availability & security meet service levels

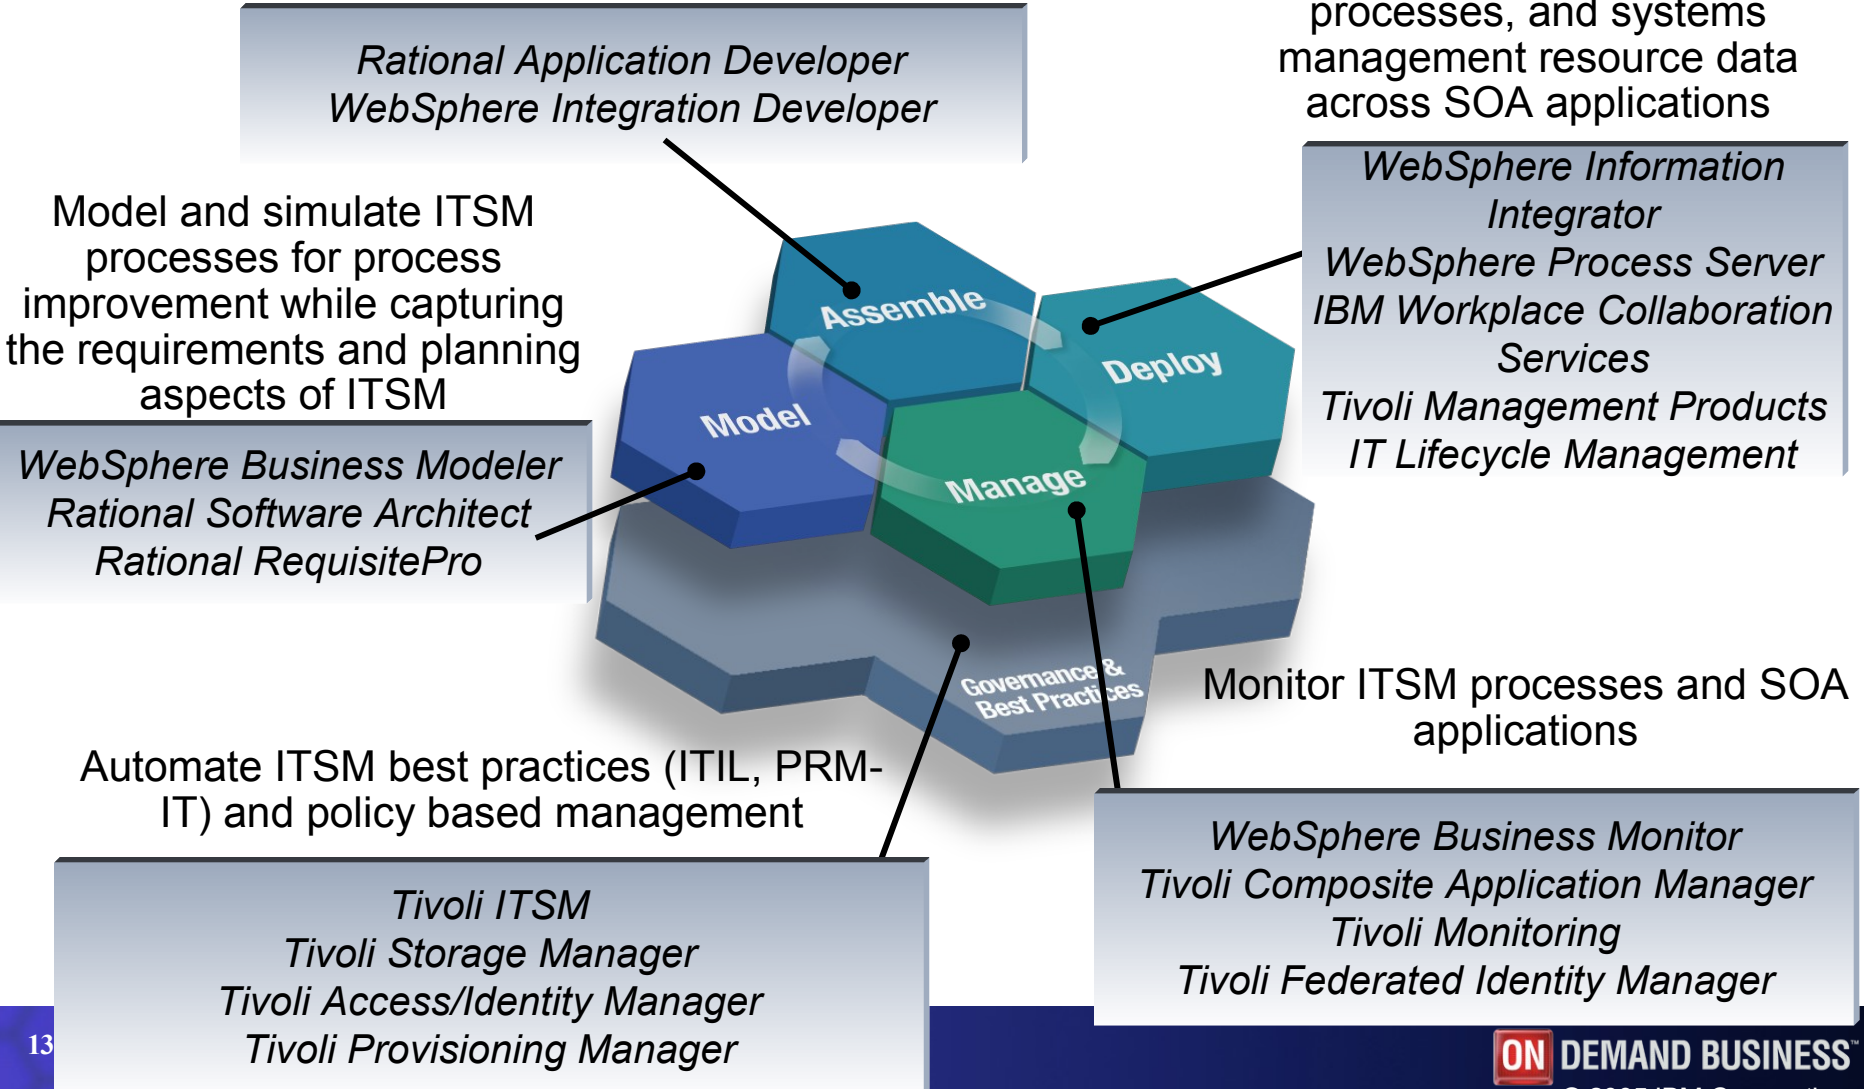

Define and refine information management rules & priorities

*IBM Databases and Tools
Tivoli Composite Application Manager
Tivoli Federated Identity Manager*

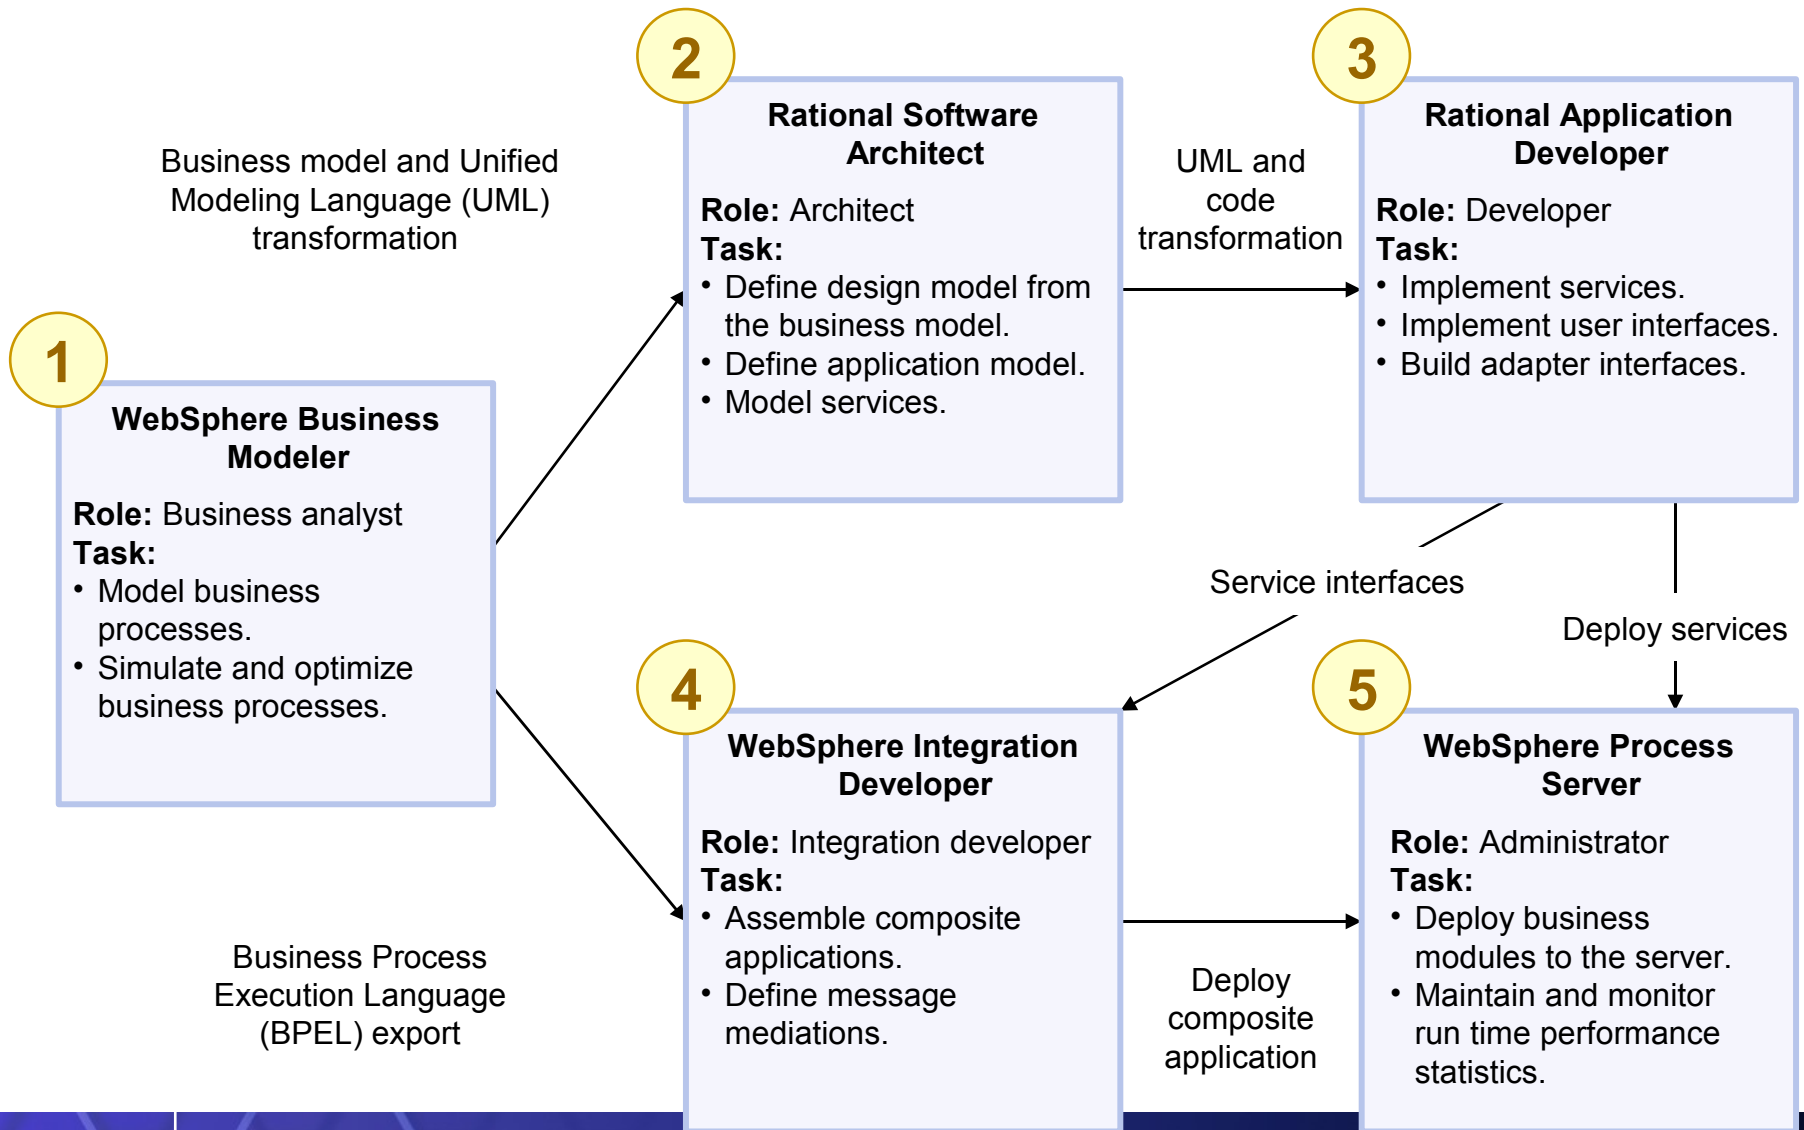

IT service management

Implement and customize process models through assembly of service components

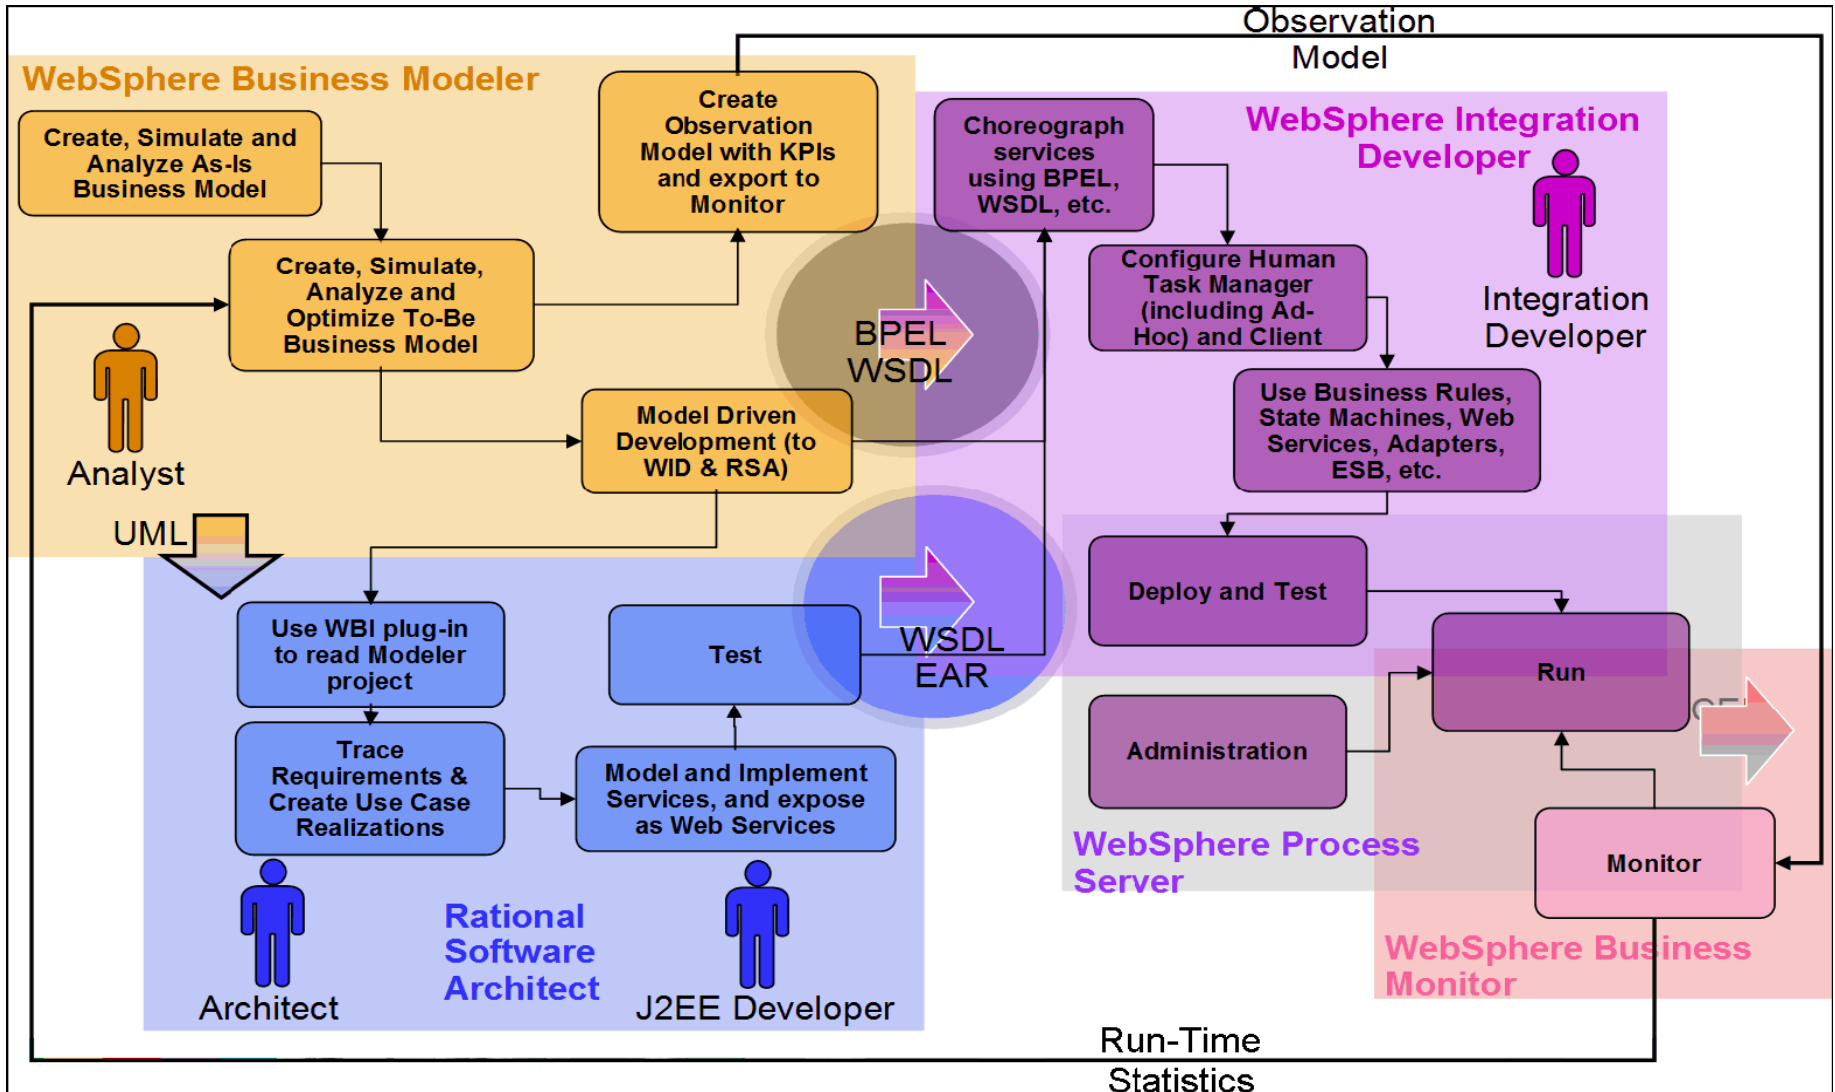

Integrate people (IT roles), IT processes, and systems management resource data across SOA applications

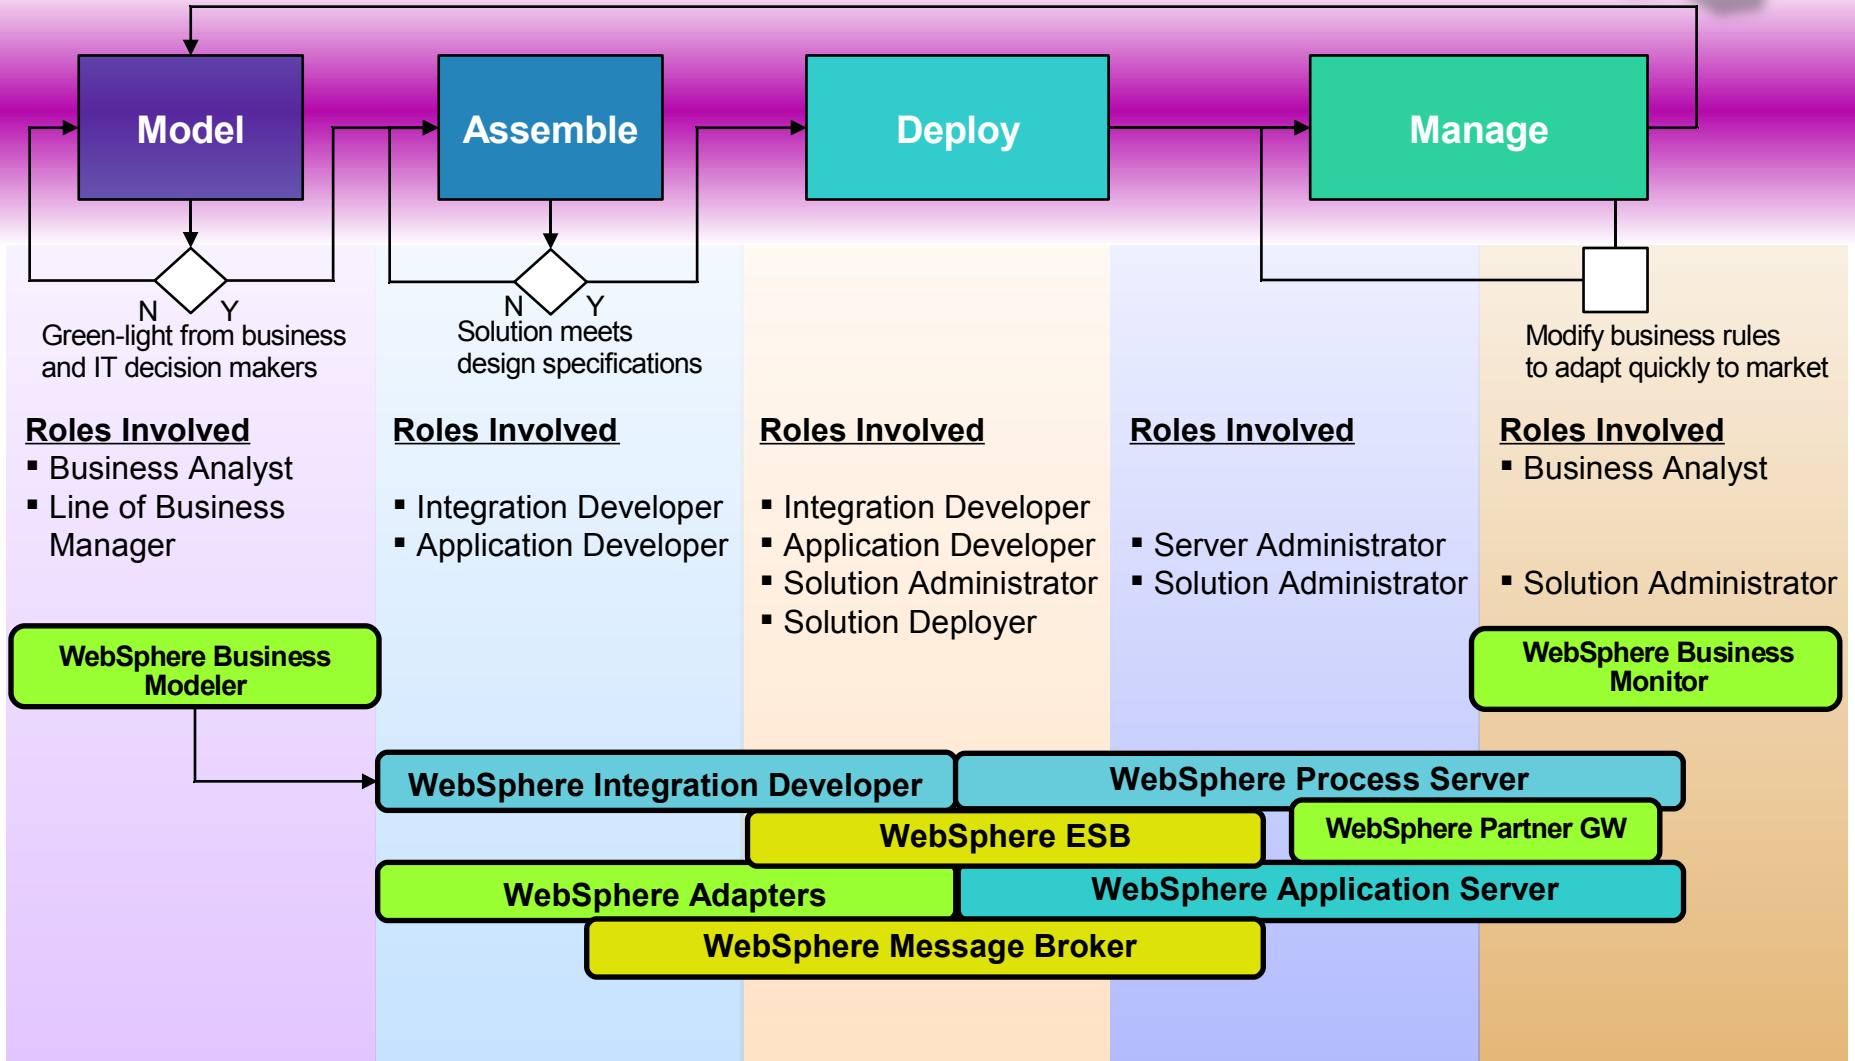

Roles in an SOA development system

Understand the Business Integration Roles - Developers

Understand the Business Integration Roles

Recommended Education Roadmaps

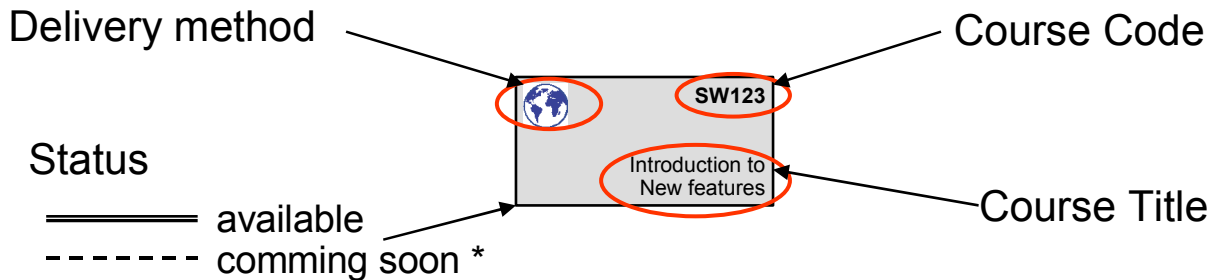

Flexible Education Options

- 

Classroom:
Classroom courses are taught by IBM and its partners in classrooms around the world
- 

Instructor led online:
A virtual classroom with hands-on labs and live instruction
- 

Web – Based:
Web-based training courses are self-directed and self-paced. Each course is divided into modules so you can select and customize your course to your own educational requirements.

*: At availability the titles of these courses may slightly differ from what is printed on the charts

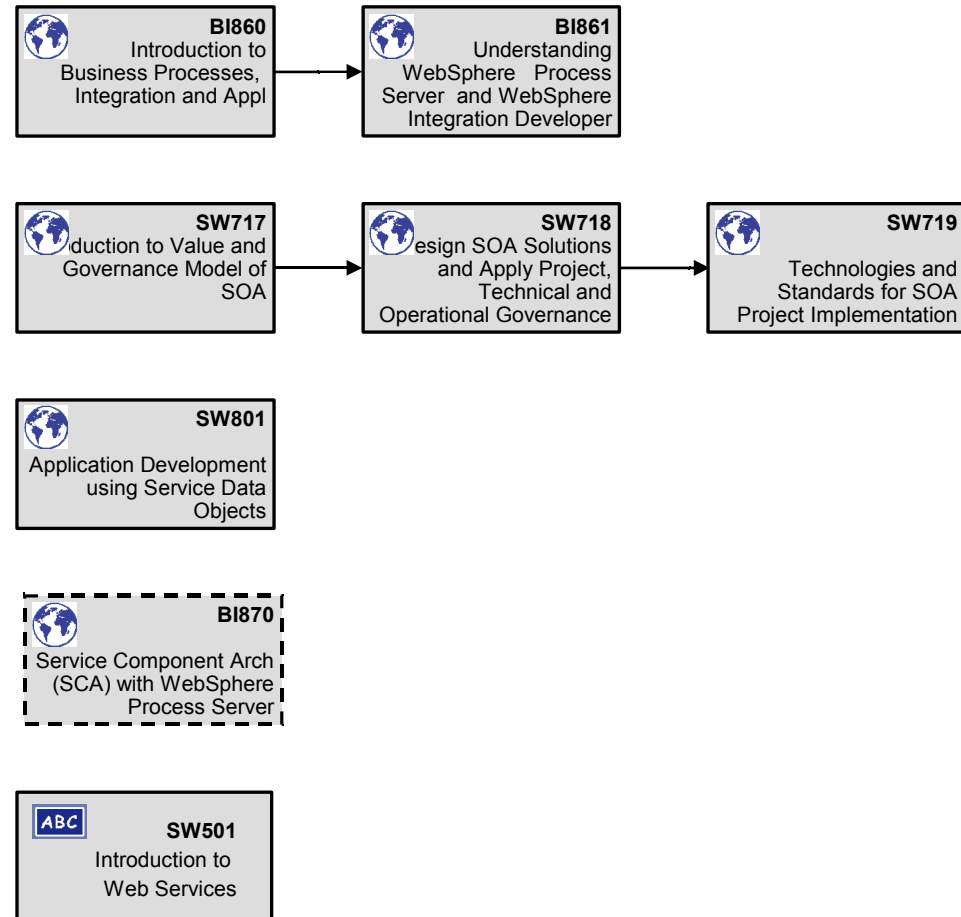

Before You Start . . .

Understanding concepts:

WebSphere Process Server 6.0 is based on service-oriented architecture (SOA) using J2EE standards for implementation and Web Services for access and integration.

To reduce the complexity of J2EE, WPS uses Service Data Object (SDO) as a universal model for business data. Service Component Architecture (SCA) defines the universal model for business services that provide or operate on business data.

To get a better understanding of the functions and features of WPS it is **highly recommended that you become familiar with these concepts.** Here is a list of (mainly web based) courses that address these topics.

Business Analyst

Primary Skills:

Secondary Skills:

A Business Analyst

- Models business processes
- Encodes business policies as business rules

Integration Developer (WID + WPS)

Primary Skills:

Secondary Skills:

An Integration Developer

- Creates interfaces and interface maps
- Creates business objects, data maps and models data relationships
- Creates business rules
- Models and creates automated business processes
- Create points for human interaction
- Models and create service-oriented view of a solution
- Builds solutions either top-down, bottom-up or meet-in-the-middle

Integration Developer (WID + WESB)

Primary Skills:

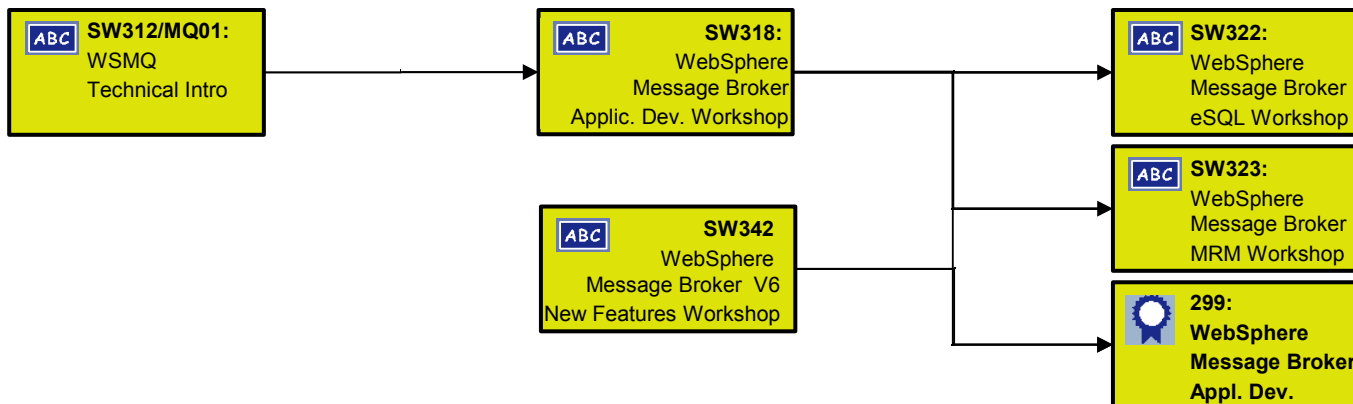

Secondary Skills:

Integration Developer (WebSphere Message Broker)

Primary Skills:

Secondary Skills:

BI824
WebSphere BI Adapter
Development –
Introduction

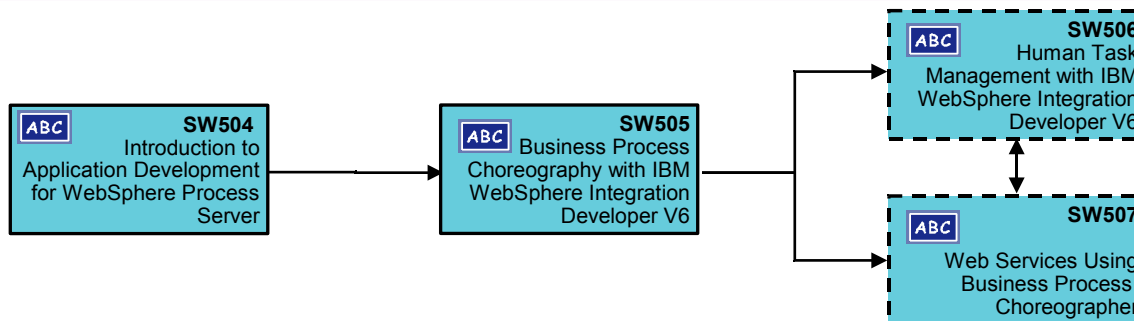

or

BI162
WebSphere BI Adapters
- Adapter Development

Application Developer

Primary Skills:

Secondary Skills:

An Application Developer

- Implements specific segments of business logic.
- Writes underlying application logic
- Exposes application logic as a service

Solution Deployer

Primary Skills:

ABC **BI111**
Integrating using
WebSphere
Integration Developer
and Process Server

OR

BI863
Integrating using
WebSphere
Integration Developer
and Process Server

ABC **SW246**
WebSphere Application
Server Administration

ABC **SW428**
Installation & Admin. of
WebSphere Process
Server

ABC **SW341**
From J2EE Applications
To Business Processes
WebSphere Admin.

This course is a combined offering of SW246 and SW428

Secondary Skills:

BI830
WebSphere Partner
Gateway
Introduction

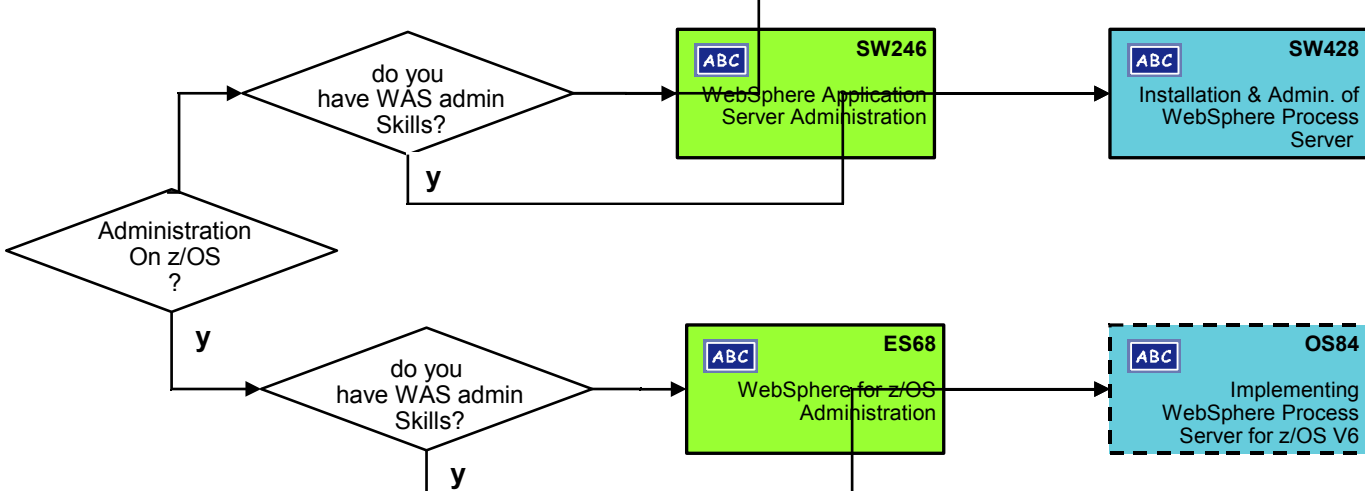

A Solution Deployer

- Is responsible for deployment of the application
- Packages artifacts for deployment
- Deploys solutions onto server
- Configures solution for various environments

Solution Administrator (WPS)

Primary Skills:

Secondary Skills:

BI830
WebSphere Partner Gateway Introduction

BI187
WebSphere Business Monitor – OME Using Monitor v6.0

or

BI819
WebSphere Business Monitor – OME Using Monitor v6 (BI187 self-paced)

A Solution Administrator

- Is responsible for the administration of the deployed application
- Monitors & analyzes the solution for server performance issues
- Diagnoses errors at the service implementation / binding level

Solution Administrator (WESB)

Primary Skills:

SA-M601
Getting Started with WebSphere ESB

or

SW861
WESB Introduction and Overview

Administration On z/OS ?

do you have WAS admin Skills?

y

SW246 WebSphere Appl. Server Admin. **SW346** **SW344** WESB Administration

or

BI131
WESB – Implementing and ESB

y

do you have WAS admin Skills?

y

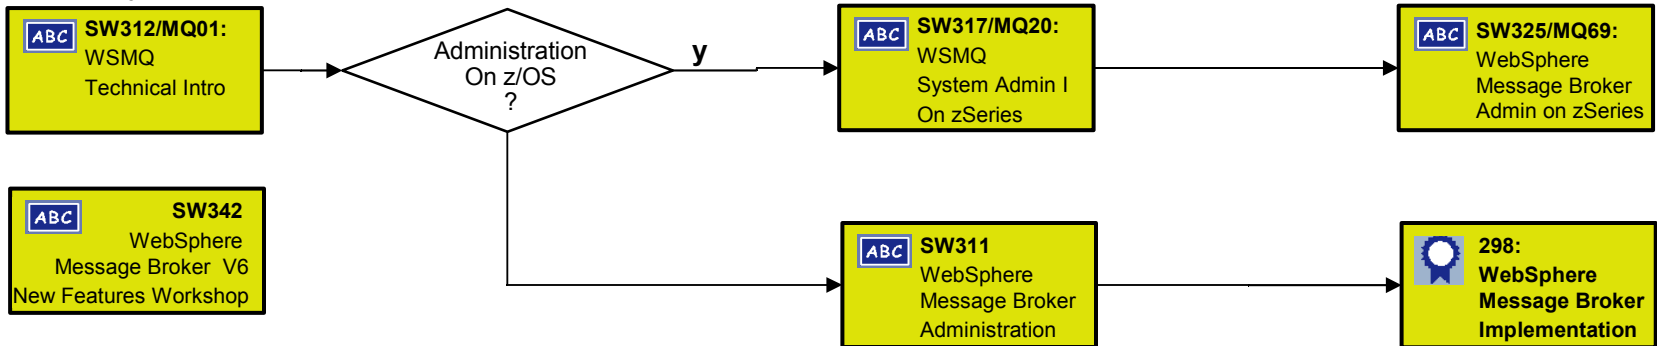

ES68 WebSphere for z/OS Implementation

SW345 WESB Administration on z/OS

Solution Administrator (WMB)

Primary Skills:

Tailored Education Offerings

- Business Partner Technical Enablement programme
- Private / onsite education offerings, tailored to customers' needs
- Education as part of **service** offering
- . . .

No block building without „building blocks“

- In theory, SOA does not depend on the implementation of the underlying services, as long as these are *exposed* according to SOA standards

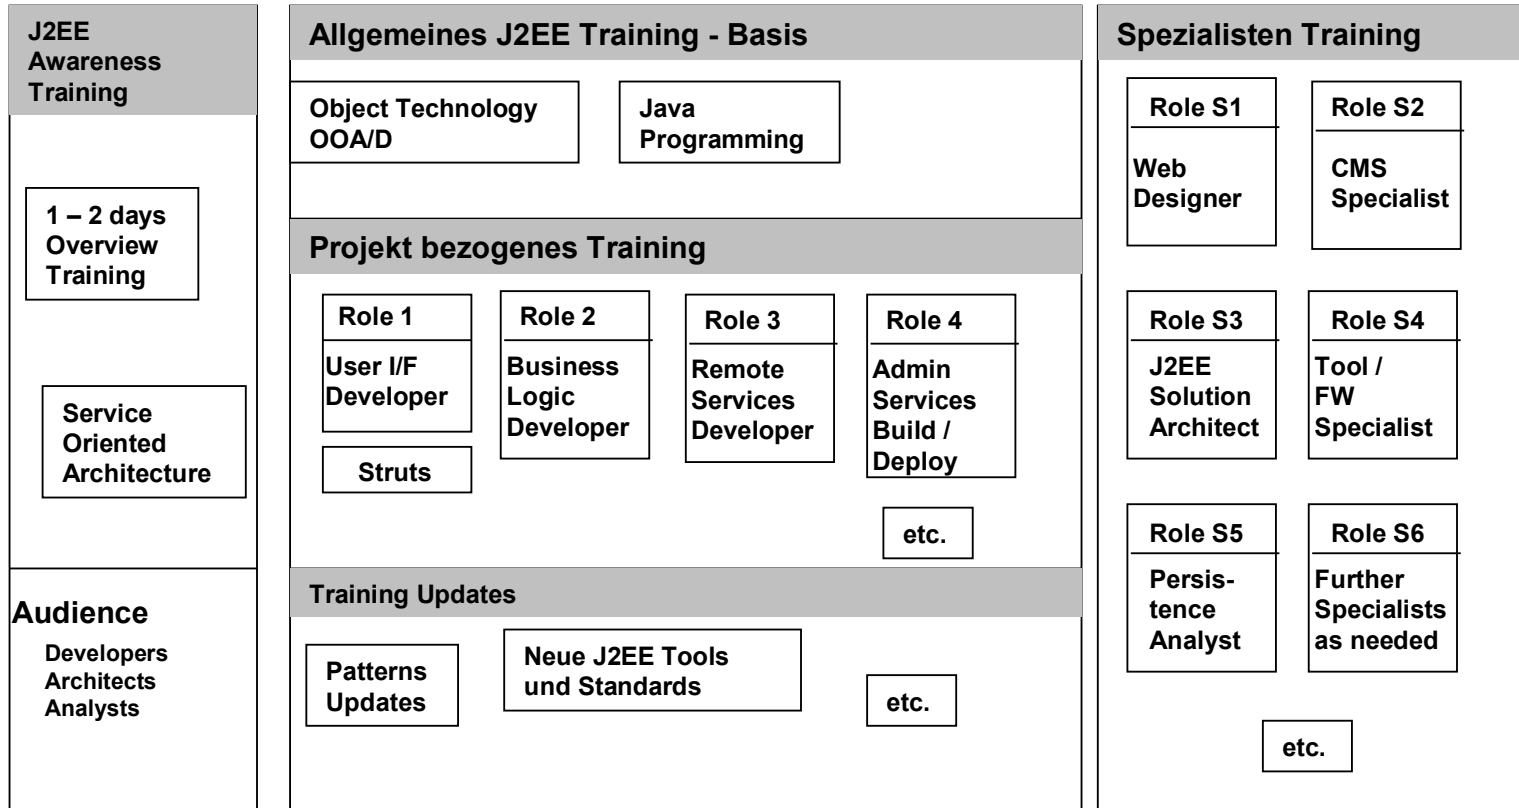

BUT

- SOA is tailor-made for the use of Java and J2EE!

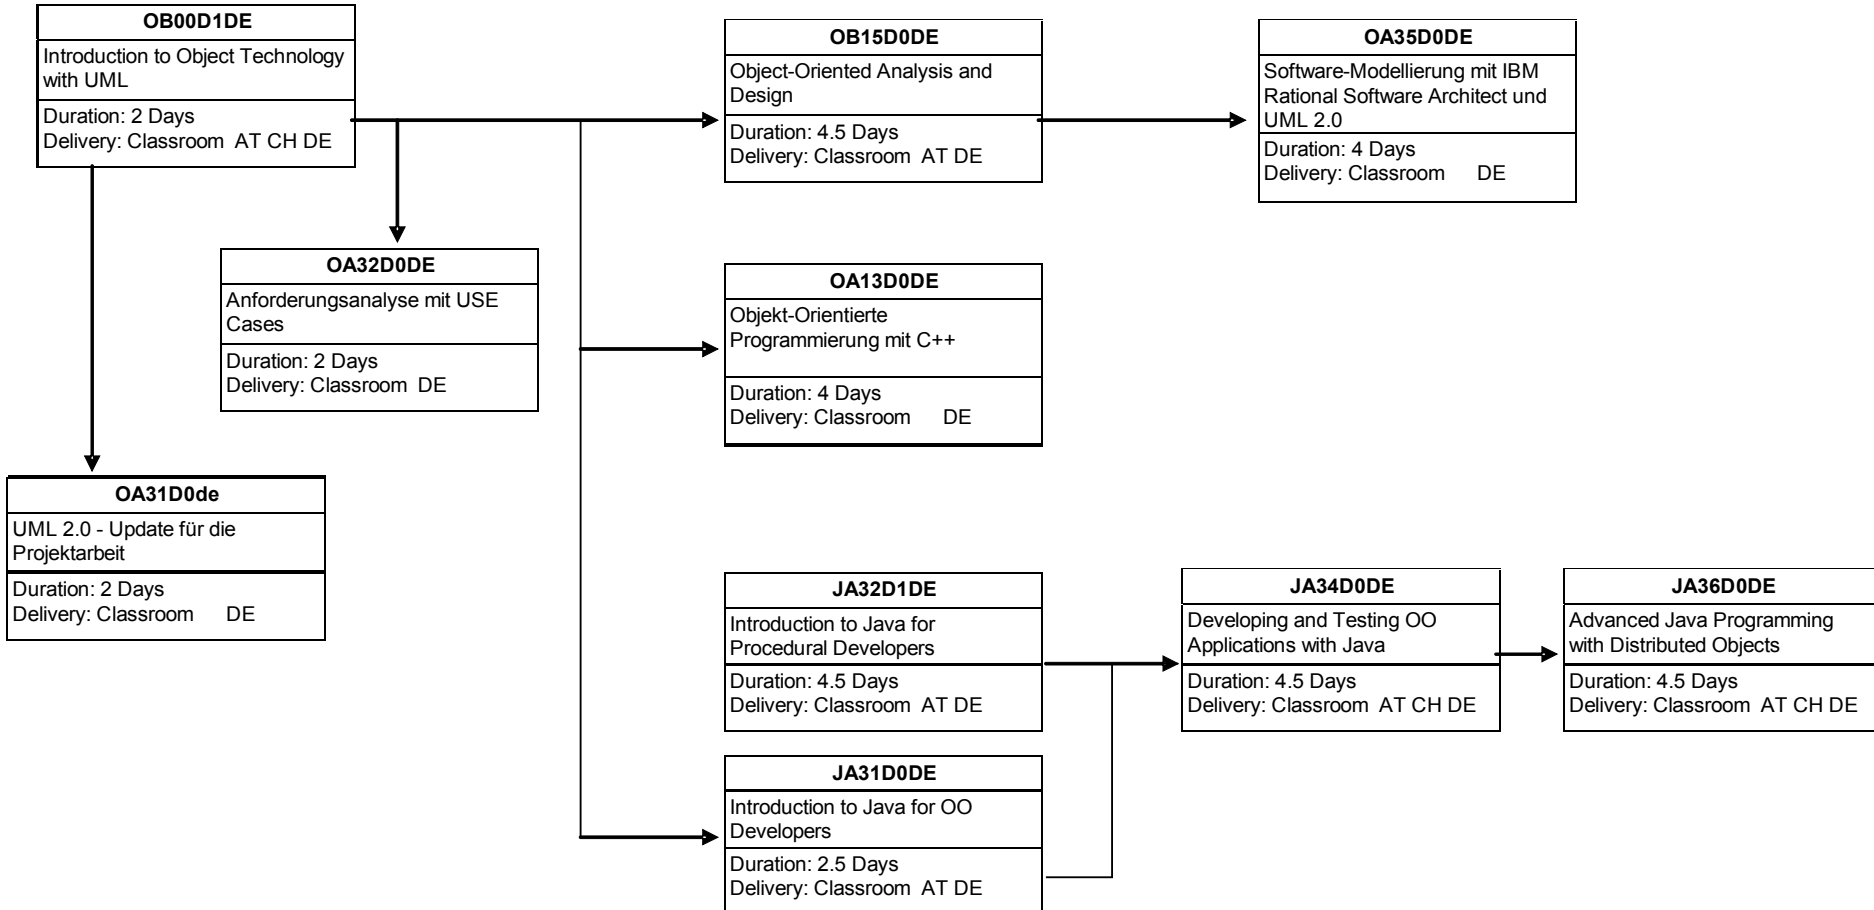

→ A good Java/J2EE background is essential!

J2EE Development Blueprint

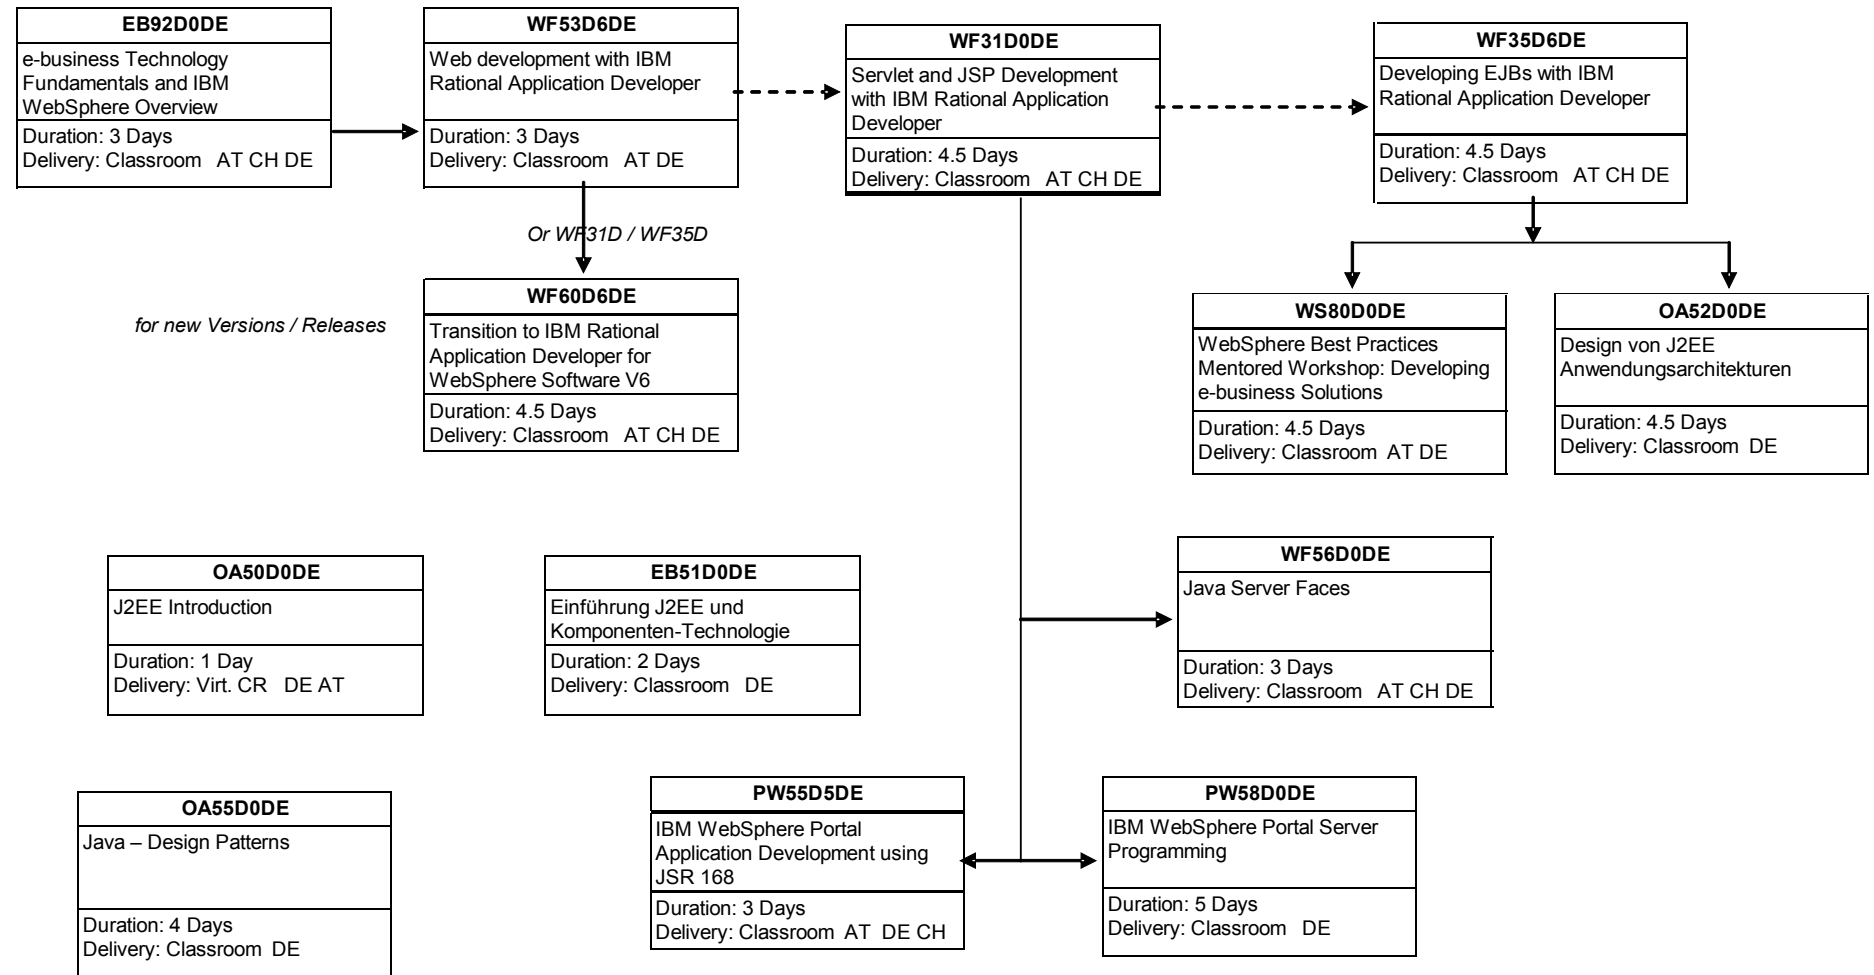

Curriculum Struktur/Zielgruppe: Entwickler, Analytiker, Architekten

Object-Oriented Technology / Java / C++

J2EE / WebSphere Development
